WINTERGREEN FUND, INC.

Summary Section

Investment Objective

The investment objective of Wintergreen Fund, Inc. (the “Fund”) is capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

	Investor Class	Institutional Class
Shareholder Fees (fees paid directly from your investment)		
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of amount redeemed)	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and Other Distributions (as a percentage of amount reinvested)	None	None
Redemption Fee (as a percentage of amount redeemed on shares held for 60 calendar days or less)	2.00%	2.00%
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)		
Management Fees	1.50%	1.50%
Distribution and/or Service (12b-1) Fees	0.25%	None
Other Expenses	0.29%	0.29%
Total Annual Fund Operating Expenses	<u>2.04%</u> ⁽¹⁾	<u>1.79%</u> ⁽¹⁾

⁽¹⁾ This table does not reflect the application of the expense limitation agreement discussed in the section of the Prospectus entitled “Management — Investment Manager.” Pursuant to that agreement, Wintergreen Advisers, LLC (the “Investment Manager”), the Fund’s investment manager, has voluntarily agreed to waive its investment management fee or reimburse the Fund to the extent necessary to ensure that the annual fund operating expenses for the Fund’s Investor Class shares and Institutional Class shares do not exceed 1.95% and 1.70%, respectively.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% rate of return each year and that the Fund’s operating expenses remain the same each year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>Class of Shares</u>	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>	<u>10 Years</u>
Investor Class	\$207	\$640	\$1,098	\$2,369
Institutional Class	\$182	\$563	\$ 970	\$2,105

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes

when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the Fund's most recent fiscal year, the Fund's portfolio turnover rate was 1% of the average value of its portfolio.

Principal Investment Strategies of the Fund

Under normal market conditions, the Fund invests mainly in equity securities of companies that the Investment Manager believes are available at market prices less than their intrinsic value.

The Investment Manager will follow a global value approach to investing. The Fund intends to trade in securities of U.S. or non-U.S. companies that the Investment Manager believes trade at a discount to intrinsic value. The Fund may invest in securities of companies that are, or are about to be, involved in reorganizations, financial restructurings or bankruptcy, which may involve the purchase of bank debt, lower-rated or defaulted debt securities (including so-called "junk bonds"), comparable unrated debt securities, or other indebtedness (or participations in the indebtedness) of such companies. The Fund may also participate in arbitrage opportunities. While the Fund generally purchases securities for investment purposes, the Investment Manager may take an activist role with respect to a portfolio company of the Fund by seeking to influence or control management of such company, or by investing Fund assets in other companies that do so when the Investment Manager believes the Fund may benefit.

With an emphasis on equity securities believed by the Investment Manager to be undervalued, risk arbitrage, other arbitrage transactions and distressed companies, the Fund will focus its investments in areas where the Investment Manager finds the most compelling opportunities at any given moment and on situations that, in the Investment Manager's opinion, have the potential for capital appreciation. The Investment Manager will examine each security separately and will not apply a predetermined formula. In order to maintain investment flexibility, the Investment Manager has not established guidelines as to the size of an issuer, its earnings, or the industry in which it operates in order for a security to be included or excluded for purchase by the Fund.

The Fund may also engage in hedging strategies. Hedging strategies designed to reduce potential loss as a result of certain economic or market risks, including risks related to fluctuations in interest rates, currency exchange rates, and broad or specific market movements, may be used. To the extent that the Fund engages in currency hedging strategies, the Fund will primarily engage in forward foreign currency exchange contracts ("forward contracts").

The Fund may also engage in other currency transactions, such as currency futures contracts, currency swaps, options on currencies, or options on currency futures contracts, and it may engage in other types of derivative transactions, such as the purchase and sale of exchange-listed and over-the-counter ("OTC") put and call options on securities, equity and fixed-income indices and other financial instruments. The Fund may engage in the purchase and sale of financial and other futures contracts and options on futures contracts. The Fund may execute short sales of securities. To the extent that the Fund makes short sales, it expects to do so (i) as a form of hedging to offset potential declines in long positions in similar securities, (ii) in order to maintain portfolio flexibility, and/or (iii) for profit.

The Fund may invest up to 100% of its assets in foreign securities, which may include sovereign debt and participations in foreign government debt, some of which may be issued by countries with emerging markets.

Principal Risks of Investing in the Fund

The Fund is subject to several risks, any of which could cause an investor to lose money. An investment in the Fund is not a bank deposit or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The principal risks of investing in the Fund are as follows:

A portion of the Fund's assets may be allocated to stocks, in which case the Fund would be subject to the following associated risks:

- **Stock Market and Equity Risk**, which is the risk that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices. When the stock market is subject to significant volatility, the risks associated with investing in the Fund may increase. Markets may, in response to governmental actions or intervention, economic or market developments, or other external factors, experience periods of high volatility and reduced liquidity. During those periods, the Fund may experience high levels of shareholder redemptions, and may have to sell securities at times when the Fund would otherwise not do so, potentially at unfavorable prices. Certain securities may be difficult to value during such periods. In addition, an individual company may underperform or be negatively affected by economic or other developments, and the price of the company's securities may decline as a result.
- **Value Risk**, which is the risk that the securities in which the Fund invests may never reach what the Investment Manager believes are their full market values.

A portion of the Fund's assets may be allocated to foreign securities, in which case the Fund would be subject to the following associated risks:

- **Foreign Securities Risk**, which is the risk associated with investments in foreign countries. The following factors make foreign securities more volatile: political, economic and social instability; foreign securities may be harder to sell, brokerage commissions and other fees may be higher for foreign securities; and foreign companies may not be subject to the same disclosure and reporting standards as U.S. companies.
- **Emerging Markets Risk**, which is the risk that investments in emerging markets may be more pronounced than the risks involved in investing in more developed foreign markets. Risks associated with investing in emerging markets include limited information about companies in these countries, greater political and economic uncertainties compared to developed foreign markets, underdeveloped securities markets and legal systems, potentially high inflation rates, and the influence of foreign governments over the private sector.
- **Currency Risk**, which is the risk that the value of foreign securities may be affected by changes in currency exchange rates.

A portion of the Fund's assets may be allocated to debt securities, in which case the Fund would be subject to the following associated risks:

- **Interest Rate Risk**, which is the risk that the value of debt securities overall will decline because of rising interest rates. The Fund may be subject to heightened interest rate risk as the current period of historically low interest rates may be ending. Interest rate risk is generally greater for fixed-income securities with longer maturities or durations, but increasing interest rates may have an adverse effect on the value of the Fund's investment portfolio as a whole.
- **Income Risk**, which is the risk that the Fund's income will decline because of falling interest rates.
- **Credit Risk**, which is the risk that a debt issuer will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of that debt to decline.

A portion of the Fund's assets may be allocated to derivative instruments, in which case the Fund would be subject to the following associated risks:

- **Counterparty Risk**, which is the risk that the other party to an agreement will default.
- **Derivatives Risk**, which is the risk that the greater complexity involved with the use of derivatives may expose the Fund to greater risks and result in poorer overall performance. Investments in derivatives may be illiquid and difficult to price. The Fund may attempt to hedge (protect) against currency risks, largely using forward contracts. Forward contracts are considered derivative investments, because their value and performance depend, at least in part, on the value and performance of an underlying asset. Risks include potential loss due to the imposition of controls by a government on the exchange of foreign currencies, delivery failure, default by the other party, or inability to close out a position because the trading market became illiquid. The Fund may also purchase and write call and put options, which involve, among other risks, the risk of capital loss and market risk associated with changes in the prices of the securities underlying the options.

A portion of the Fund's assets may be allocated to investments in smaller and mid-size companies in which case the Fund would be subject to the following associated risk:

- **Smaller and Mid-Size Companies Risk**, which is the risk that the securities of such issuers may be comparatively more volatile in price than those of companies with larger capitalizations, and may lack the depth of management, diversity in products and established markets for their products and/or services that may be associated with larger issuers.

A portion of the Fund's assets may be allocated to investments where the Investment Manager takes an activist role, in which case the Fund would be subject to the following associated risk:

- **Investor Activism Risk**, which is the risk that if the Investment Manager actively seeks to influence the management of a portfolio company in which the Fund is invested, the Fund's investment results, trading flexibility (including the time and manner in which the Fund may dispose of its holdings in the company), exposure to legal claims, and costs, including legal expenses, may be impacted.

To the extent that the Fund participates in arbitrage opportunities, it would be subject to the following risk:

- **Arbitrage Risk**, which is the risk that a security purchased pursuant to an arbitrage strategy intended to take advantage of a perceived relationship between the value of two securities may not perform as expected.

To the extent that the Fund invests in distressed companies, it would be subject to the following risk:

- **Distressed Company Risk**, which is the risk that securities of a distressed company may be subject to greater credit, issuer and liquidity risk than other securities. It is possible that a distressed company that has issued a debt security may be unable to make principal and interest payments.

An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Further discussion about other risks of investing in the Fund may be found in the section in this Prospectus entitled "Principal Investment Strategies, Related Risks, and Disclosure of Portfolio Holdings," and in the Fund's Statement of Additional Information (the "SAI"). BECAUSE THE SECURITIES THE FUND HOLDS FLUCTUATE IN PRICE, THE VALUE OF YOUR INVESTMENT IN THE FUND WILL GO UP AND DOWN. YOU COULD LOSE MONEY.

Performance

The bar chart demonstrates the variability of the Fund's return by showing changes in the performance from year to year for Investor Class shares (the class with the longest record of annual returns). The table shows how the Fund's average annual returns for 1-year, 5-year, and 10-year and since inception periods compare with those of a broad measure of market performance. The S&P 500® Index is a broad based unmanaged index representing the performance of 500 widely held common stocks. One cannot invest directly in an index. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at www.wintergreenfund.com or by calling (888) GOTOGREEN (888-468-6473).

INVESTOR CLASS

Calendar Years Ended December 31

During the periods shown in the chart, the highest quarterly return was 22.59% (for the quarter ended June 30, 2009) and the lowest quarterly return was -21.16% (for the quarter ended December 31, 2008).

Average Annual Total Returns

For the periods ended December 31, 2017

				Since Institutional Class Inception (12/30/2011)
Wintergreen Fund, Inc.	1 Year	5 Year	10 Year	
Investor Class – Return Before Taxes	14.00%	5.38%	3.25%	N/A
Investor Class – Return After Taxes on Distributions	8.21%	3.71%	2.41%	N/A
Investor Class – Return After Taxes on Distributions and Sale of Fund Shares	12.67%	4.16%	2.55%	N/A
Institutional Class – Return Before Taxes	14.17%	5.63%	N/A	5.97%
S&P 500® Index (reflects no deduction for fees, expenses, or taxes)	21.83%	15.79%	8.50%	15.82%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In certain cases, the figure representing "Return After Taxes on Distributions and Sale of Fund Shares" may be higher than the other return figures for the same period. A higher after tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts ("IRA"). After tax returns are presented for the Investor Class shares only. After tax returns for the Institutional Class shares will vary.

Investment Manager

Wintergreen Advisers, LLC is the Fund's investment manager.

Portfolio Manager

David J. Winters, the managing member of the Investment Manager, has served as the Fund's portfolio manager since its inception in 2005.

Purchase and Sale of Fund Shares

The minimum initial amount of investment in Investor Class shares is \$10,000 for regular accounts and automatic investment plans; \$3,000 for retirement accounts; and \$2,000 for Coverdell Education Savings Accounts ("Coverdell ESAs"). For Institutional Class shares, the minimum initial amount of investment is \$100,000. Subsequent investments in the Investor Class may be made with a minimum investment of \$100 in automatic investment plans and \$1,000 in all other plans. Subsequent investments in the Institutional Class may be made with a minimum investment of \$1,000. You may purchase or redeem shares of the Fund each weekday that the New York Stock Exchange ("NYSE") is open. You may purchase or redeem Fund shares by mail (Wintergreen Fund, Inc., c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701 (for regular mail) or 615 East Michigan Street, 3rd Floor Milwaukee, WI 53202 (for overnight or express mail)), by telephone at (888) GOTOGREEN (888-468-6473), or through the Internet at www.wintergreenfund.com. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly.

Tax Information

Distributions with respect to Fund shares held by a tax-deferred or qualified plan, such as an IRA or a 401(k) plan, generally will not be taxable to the plan. Distributions from such plans will be taxable to individual participants under applicable tax rules without regard to the character of the income earned by the plan.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may compensate the intermediary for selling shares of the Fund and for providing shareholder record keeping, communication, and/or other shareholder services. This compensation may create a conflict of interest by influencing the broker-dealer or financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Principal and Additional Investment Strategies, Other Investment Policies, Risk Factors and Special Considerations, and Disclosure of Portfolio Holdings

Principal and Additional Investment Strategies of the Fund

Under normal market conditions, the Fund invests mainly in equity securities (including securities convertible into, or that the Investment Manager expects to be exchanged for, common or preferred stock) of companies that the Investment Manager believes are available at market prices less than their intrinsic value. The Investment Manager will seek to identify securities through extensive analysis and research, taking into account, among other factors, the relationship of book value to market value, cash flow, and multiples of earnings.

The Investment Manager will follow a global approach to investing that combines the following key elements:

Activism The Investment Manager may seek to influence or control management (*i.e.*, take an activist role) with respect to a company in which the Fund has invested, when the Investment Manager believes doing so will benefit the Fund. The Investment Manager may also take an activist role with respect to a portfolio company of the Fund by investing Fund assets in other companies that seek to influence or control the portfolio company when the Investment Manager believes such investment may be advantageous for the Fund.

Arbitrage Arbitrage opportunities will typically involve securities of companies involved in restructurings (such as mergers, acquisitions, consolidations, liquidations, spinoffs, or tender and exchange offers) or that the Investment Manager believes are attractively priced relative to an economically equivalent security of the same or another company.

Bankruptcy Securities of companies that are, or are about to be, involved in bankruptcy.

Cash and Convertibles Cash equivalent instruments and debt securities or preferred stock that are convertible into common stock.

Distressed Companies Securities of companies that are, or are about to be, involved in reorganizations, financial restructurings, or bankruptcy. The Fund may invest in distressed companies which typically involves the purchase of bank debt, lower-rated or defaulted debt securities, comparable unrated debt securities, or other indebtedness (or participations in the indebtedness) of such companies. The debt securities which the Fund may purchase may either be unrated, or rated in any rating category established by one or more independent rating organizations, such as S&P Global Ratings ("S&P") or Moody's Investors Service ("Moody's"). The Fund may invest in securities that are rated in the medium to lowest rating categories by S&P and Moody's, some of which may be so-called "junk bonds." The Fund will invest in debt securities based on their overall potential for capital appreciation, and therefore, such debt securities will have varying maturity dates.

Equities that are Undervalued Securities that are traded at a discount to intrinsic value.

Financings Securities of companies that are, or are about to be, involved in financial restructurings, or expect to participate in such financings.

Global Securities Securities of both U.S. issuers and non-U.S. issuers, including securities of issuers in emerging markets.

Hedging Strategies Strategies designed to reduce potential loss as a result of certain economic or market risks, including risks related to fluctuations in interest rates, currency exchange rates, and broad or specific market movements may be used. To the extent that the Fund engages in currency hedging strategies, the Fund will primarily engage in forward contracts. The Fund may also engage in other currency transactions such as currency futures contracts, currency swaps, options on currencies, or options on currency futures

contracts, or it may engage in other types of transactions, such as the purchase and sale of exchange-listed and OTC put and call options on securities, equity and fixed-income indices and other financial instruments; and the purchase and sale of financial and other futures contracts and options on futures contracts.

BECAUSE THE SECURITIES THE FUND HOLDS FLUCTUATE IN PRICE, THE VALUE OF YOUR INVESTMENT IN THE FUND WILL GO UP AND DOWN. YOU COULD LOSE MONEY.

The Investment Manager employs a research driven, fundamental value strategy with respect to the Fund's investments. With an emphasis on equity securities believed by the Investment Manager to be undervalued, risk arbitrage and other arbitrage transactions, and distressed companies, the Investment Manager will focus the Fund's investments in areas where it finds the most compelling opportunities at any given moment and on situations that, in the Investment Manager's opinion, have the potential for capital appreciation. In choosing equity investments, the Investment Manager focuses on the market price of a company's securities relative to the Investment Manager's own evaluation of the company's asset value, including an analysis of book value, cash flow potential, long-term earnings, and multiples of earnings. Similarly, debt securities and other indebtedness, including loan participations, are generally selected based on the Investment Manager's own analysis of the security's intrinsic value rather than the coupon rate or third party credit rating of the security. The Investment Manager examines each investment separately and there are no set criteria as to specific value parameters, asset size, earnings, or industry type. The Investment Manager also considers the ability of a company's management to deliver superior shareholder returns.

The Fund may execute short sales of securities. To the extent that the Fund makes short sales, it expects to do so (i) as a form of hedging to offset potential declines in long positions in similar securities, (ii) in order to maintain portfolio flexibility, and/or (iii) for profit.

The Fund may also engage from time to time in an "arbitrage" strategy. When engaging in an arbitrage strategy, a fund typically buys one security while at the same time selling short another security.

In pursuit of its value-oriented strategy, the Fund is not limited to pre-set maximums governing the size of the companies in which it may invest. However, the Fund may invest substantially in mid-cap and large-cap companies with market capitalization values (share price times the number of common stock shares outstanding) greater than \$1.5 billion at the initial time of purchase. The Fund may also invest a significant portion of its assets in small-cap companies.

The Fund may invest substantially and may invest up to 100% of its assets in foreign securities, which may include sovereign debt and participations in foreign government debt, some of which may be issued by countries with emerging markets.

The Investment Manager may sell a portfolio holding if the holding no longer meets the Investment Manager's criteria for investment by the Fund, more attractive investments are identified, funds are required for other purposes, or the holding becomes overvalued relative to the long-term expectation for its price.

Other Investment Policies of the Fund

The Fund may also engage in the investment activities described below.

Liquidity The Fund may invest up to 15% of its net assets in illiquid securities. For this purpose, the term "illiquid securities" currently means securities that cannot be disposed of within seven days in the ordinary course of business at approximately the amount the Fund has valued the securities. After the applicable compliance date for new Rule 22e-4 under the 1940 Act, the term shall mean any security or investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

Reduced liquidity may have an adverse impact on market price and the Fund's ability to sell particular securities when necessary to meet the Fund's liquidity needs or in response to a specific economic event, such as the deterioration in the creditworthiness of an issuer. Reduced liquidity in the secondary market for certain securities may also make it more difficult for the Fund to obtain market quotations based on actual trades for the purpose of valuing the Fund's portfolio.

Temporary Investments The Investment Manager may keep a portion, which may be significant at times, of the Fund's total assets in cash or invested in high-quality short-term, money market instruments, corporate debt, or direct or indirect U.S. and non-U.S. government and agency obligations, when it believes that insufficient investment opportunities meeting the Fund's investment criteria exist or that it may otherwise be necessary to maintain liquidity. For example, when prevailing market valuations for securities are high, there may be fewer securities available at prices below their intrinsic value. In addition, when the Investment Manager believes market or economic conditions are unfavorable for investors, the Investment Manager may invest up to 100% of the Fund's assets in U.S. or non-U.S. dollar denominated short-term investments, including cash or cash equivalents. In these circumstances, the Fund may be unable to pursue its investment goals.

Repurchase Agreements The Fund may enter into repurchase agreements as a non-principal investment strategy. The Fund may invest up to 50% of its total assets in repurchase agreements. Repurchase agreements involve the purchase by a fund of a security that a seller has agreed to buy back, usually within one to seven days. The seller's promise to repurchase the security is fully collateralized by securities equal in value to 102% of the purchase price, including accrued interest. If the seller defaults and the collateral value declines, the fund might incur a loss. If the seller declares bankruptcy, the fund may not be able to sell the collateral at the desired time. The Fund enters into these agreements only with brokers, dealers, or banks that are approved by the Investment Manager under credit quality standards established by the Fund's Board of Directors (the "Board").

Future Developments The Fund may take advantage of other investment practices and invest in new types of securities and financial instruments that are not currently contemplated for use by the Fund, or are not available but may be developed, to the extent such investment practices, securities and financial instruments are consistent with the Fund's investment objective and legally permissible for the Fund. Such investment practices, if they arise, may involve risks that exceed those involved in the activities described above.

Risk Factors and Special Considerations

Stocks Individual stock prices may go up and down dramatically. These price movements may result from factors affecting individual companies, industries, or securities markets. For example, a negative development regarding an individual company's earnings, management, or accounting practices may cause its stock price to decline, or a negative industry-wide event or broad-based market drop may cause the stock prices of many companies to decline.

Value Investing Value securities may not increase in price as anticipated by the Investment Manager, and may even decline further in value, if other investors fail to recognize the company's value or favor investing in faster-growing companies, or if the events or factors that the Investment Manager believes will increase a security's market value do not occur.

The Fund's focus on securities believed to be undervalued may result in the Fund choosing securities that are not widely followed by other investors. Securities that are considered undervalued may also include those of companies reporting poor earnings, companies whose share prices have declined sharply (sometimes growth companies that have recently stumbled to levels considered "cheap" in the Investment Manager's opinion), turnarounds, cyclical companies, or companies emerging from bankruptcy, all of which may have a higher risk of being ignored or rejected, and therefore, undervalued by the market or losing more value.

Foreign Securities Securities of companies located outside the U.S. involve additional risks that can increase the potential for losses in the Fund to the extent that it invests in these securities. Certain of these risks may also apply to securities of U.S. companies with significant foreign operations. These risks can increase the potential for losses in the Fund and affect its share price.

Currency Exchange Rates

The Fund values portfolio securities in U.S. dollars. Foreign securities may be issued and traded in foreign currencies. As a result, their values may be affected by changes in exchange rates between foreign currencies and the U.S. dollar, as well as between currencies of countries other than the U.S. For example, if the value of the U.S. dollar goes up compared to a foreign currency, an investment traded in that foreign currency will go down in value because it will be worth fewer U.S. dollars.

Political and Economic Developments

The political, economic, and social structures of some foreign countries in which the Fund invests may be less stable and more volatile than those in the U.S. Investments in these countries may be subject to the risks of internal and external conflicts, currency devaluations, foreign ownership limitations, and tax increases. It is possible that a government may take over the assets or operations of a company or impose restrictions on the exchange or export of currency or other assets. Some countries may also have different legal systems that may make it difficult for the Fund to vote proxies, exercise shareholder rights, and pursue legal remedies with respect to their foreign investments. Diplomatic and political developments, including rapid and adverse political changes, social instability, regional conflicts, terrorism, and war, could affect the economies, industries, and securities and currency markets, and the value of the Fund's investments, in non-U.S. countries. These factors are extremely difficult, if not impossible, to predict and take into account with respect to the Fund's investments.

In June 2016, the United Kingdom ("UK") voted in a referendum to leave the European Union ("EU"). There is considerable uncertainty relating to the potential consequences and timeframe of the UK's withdrawal, and the potential impact on the UK and European economies and the broader global economy could be significant, resulting in increased volatility and illiquidity, currency fluctuations, impacts on arrangements for trading and on other existing cross-border cooperation arrangements (whether economic, tax, fiscal, legal, regulatory or otherwise), and in potentially lower growth for companies in the UK, Europe and globally, which could have an adverse effect on the value of the Fund's investments in foreign securities.

Trading Practices

Brokerage commissions and other fees may be higher for foreign securities. Government supervision and regulation of foreign stock exchanges, currency markets, trading systems, and brokers may be less than in the U.S. The procedures and rules governing foreign transactions and custody (holding of the Fund's assets) may also involve delays in payment, delivery, or recovery of money or investments.

Availability of Information

Foreign companies may not be subject to the same disclosure, accounting, auditing, and financial reporting standards and practices as U.S. companies. Thus, there may be less information publicly available about foreign companies than about most U.S. companies.

Limited Markets

Certain foreign securities may be less liquid (harder to sell) and more volatile than many U.S. securities. This means the Fund may at times be unable to sell foreign securities at favorable prices.

Emerging Markets

The risks of foreign investments typically are greater in less developed countries, sometimes referred to as emerging markets. For example, political and economic structures in these countries may be less established and may change rapidly. These countries also are more likely to experience high levels of inflation, deflation, or currency devaluation, which can harm their economies and securities markets and increase volatility. Restrictions on currency trading that may be imposed by emerging market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries. The currencies of emerging market countries may experience significant declines against the U.S. Dollar, and devaluation may occur subsequent to investments in these currencies by the Fund. Inflation and rapid fluctuations in inflation rates may have negative effects on the economies and securities markets of certain emerging market countries.

Sector and Industry Risk The Fund may invest in any sector or industry. From time to time, as a result of appreciation of certain of the Fund's portfolio securities and/or a change in the size of the Fund, investments in a particular sector or industry may represent a significant portion of the Fund's overall portfolio. To the extent that such an event occurs with respect to a particular sector or industry, the Fund will be subject to greater potential risk than funds that do not have as much exposure to such sector or industry.

Tobacco Companies

A portion, or a significant portion, of the Fund's assets may be, and currently are, invested in securities issued by tobacco companies. Tobacco companies may be adversely affected by, among other factors, new legislation, enforcement of local ordinances, litigation, negative media attention, declining demand for tobacco products, tax increases, and restrictions on advertising and sales venues. To the extent that a tobacco company in which the Fund has invested is negatively impacted by such an event, the value of the Fund's investment in that company could decline and the Fund's share price could be affected.

Real Estate Management and Development Companies

A portion, or a significant portion, of the Fund's assets may be, and currently are, invested in securities issued by real estate management and development companies. Real estate management and development companies in which the Fund may invest include companies engaged in real estate development, management, and rental and/or direct investment in physical property. Such companies may be adversely affected by, among other factors, changes in general and local economic conditions, declines in the value of real estate, limited or a lack of availability of money for loans to purchase real estate, overbuilding, prolonged vacancies in rental properties, property taxes and changes in tax laws relating to real estate, costs resulting from the clean-up of, and liability resulting from, environmental problems, costs associated with damage resulting from floods, earthquakes or other disasters not covered by insurance, and limitations on, and variations in, rents and interest rates.

Liquidity Risk The Fund may not be able to sell a security or other investment held in its portfolio in the desired timeframe, which could prevent the Fund from selling the asset at an advantageous price. In addition, legal or contractual restrictions on the resale of a security may affect the Fund's ability to sell the security when deemed appropriate or necessary by the Investment Manager. Liquidity risk may be higher in a rising interest rate environment, when the value and liquidity of fixed-income securities generally decline.

Currency Hedging The Fund may attempt to hedge (protect) against currency risks, largely using forward contracts, where available and when, in the Investment Manager's opinion, it would be advantageous to the Fund. A forward contract is an agreement to buy or sell a specific currency at a future date and at a price set at the time of the contract. Forward contracts may reduce the risk of loss from a change in value of a currency, but they also limit any potential gains and do not protect against fluctuations in the value of the underlying position.

Forward contracts are considered derivative investments, because their value and performance depend, at least in part, on the value and performance of an underlying asset. The Fund's investments in derivatives may involve a small investment relative to the amount of risk assumed. To the extent the Fund enters into these transactions, its success will depend on the Investment Manager's ability to predict market movements, and their use may have the opposite effect of that intended. Risks include potential loss due to the imposition of controls by a government on the exchange of foreign currencies, delivery failure, default by the other party, or inability to close out a position because the trading market became illiquid.

Risk Arbitrage Securities and Distressed Companies A merger, other restructuring, tender, or exchange offer proposed at the time the Fund invests in risk arbitrage securities may not be completed on the terms or within the time frame contemplated, resulting in losses to the Fund. Debt obligations of distressed companies typically are unrated, lower-rated, in default or close to default. Also, securities of distressed companies are generally more likely to become worthless than the securities of more financially stable companies.

Smaller and Mid-Size Companies Smaller companies, and to some extent mid-size companies, involve substantial risks and should be considered speculative. Historically, smaller and mid-size company securities have been more volatile in price than larger company securities, especially over the short term. Among the reasons for the greater price volatility are the less certain growth prospects of such companies, the lower degree of liquidity in the markets for such securities, and the greater sensitivity of smaller and mid-size companies to changing economic conditions.

In addition, small and mid-size companies may lack depth of management, be unable to generate funds necessary for growth or development, or be developing or marketing new products or services for which markets are not yet established and may never become established.

Credit This is the risk that the issuer or the guarantor of a debt security, or the counterparty to a derivatives contract, will be unable or unwilling to make timely payments of interest or principal or to otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit rating. There is the possibility that the credit rating of a fixed-income security may be downgraded after purchase, which may adversely affect the value of the security. Credit risk is greater for lower-rated securities. These debt securities and similar unrated securities (commonly known as "junk bonds") have speculative elements or are predominantly speculative credit risks.

The Fund may be subject to greater credit risk because it may invest in debt securities issued in connection with corporate restructurings by highly leveraged issuers and in debt securities that are not current in the payment of interest or principal or are in default. The Fund invests in foreign securities and as such is also subject to increased credit risk because of the difficulties of requiring foreign entities, including issuers of sovereign debt obligations, to honor their contractual commitments, and because a number of foreign governments and other issuers are already in default.

Lower-Rated and Unrated Debt Securities Securities rated below investment grade, sometimes called "junk bonds," and the type of unrated debt securities that may be purchased by the Fund, generally are considered to have more risk than higher-rated securities. They may also fluctuate more in price, and are less liquid than higher-rated securities. Their prices are especially sensitive to developments affecting the company's business and to ratings changes, and typically rise and fall in response to factors that affect the company's stock prices. Issuers of such lower-rated debt securities are not as strong financially, and are more likely to encounter financial difficulties and be more vulnerable to adverse changes in the economy, such as a recession or a sustained period of rising interest rates. The risk that the Fund may lose its entire investment in defaulted bonds is greater in comparison to investing in non-defaulted bonds.

Loan Participations In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the Fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund may be subject to the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. Certain participations may be structured in a manner designed to avoid purchasers of participations being subject to the credit risk of the lender with respect to the participation, but even under such a structure, in the event of the lender's insolvency, the lender's servicing of the participation may be delayed and the assignability of the participation impaired.

Investor Activism Risk To the extent that the Investment Manager takes an activist role with respect to a portfolio company of the Fund, the Fund will be subject to additional risks other than a possible decline in the value of the Fund's investment in such company. These risks include the risk that the Fund may incur substantial expenses and costs, such as legal expenses, and it is possible that such expenses and costs may not be recouped. There is no guarantee that the investment results will not be disappointing if the portfolio company resists the Investment Manager's efforts, or alternatively, if the portfolio company adopts the Investment Manager's proposed strategy, which may prove to be misguided. There also may be instances where the Fund will be restricted in transacting in a particular investment as a result of the Investment Manager's activist strategy. It is possible that the Fund or the Investment Manager may become involved in litigation or proxy solicitation activities arising from, among other things, the Investment Manager's designation of directors to serve on the board of directors of a portfolio company, which entails the risk of expense and the possibility of claims for damages against the Fund.

Interest Rate Risk This is the risk that changes in interest rates will affect the value of the Fund's investments in debt securities, such as bonds, notes and asset-backed securities, or other income-producing securities. Debt securities are obligations of the issuer to make payments of principal and/or interest on future dates. Increases in interest rates may cause the value of the Fund's investments to decline. The Fund may be subject to heightened interest rate risk as the recent period of historically low interest rates may be ending. Interest rate risk is generally greater for lower-rated securities or comparable unrated securities, and for fixed-income securities with longer maturities or durations, but increasing interest rates may have an adverse effect on the value of the Fund's investment portfolio as a whole. The value of debt securities with longer maturities is affected more by changes in interest rates because when interest rates rise, the maturities of these types of securities tend to lengthen and the value of the securities decreases more significantly. In addition, these types of securities are subject to prepayment when interest rates fall, which generally results in lower returns because the Fund must reinvest its assets in debt securities with lower interest rates.

Short Sales Risk This is the risk that the Fund will incur a loss because the price of a security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security. Although the Fund's gain in connection with a short sale transaction is limited to any differential between the replacement price and the price at which it sold the security short, its potential loss is theoretically unlimited.

Cyber Security Risk As the use of the internet and other technologies has become more prevalent in the course of business, the Fund and its service providers, including the Investment Manager, have become more susceptible to operational and financial risks associated with cyber security. Cyber security incidents can result from intentional attacks, such as obtaining unauthorized access to information systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or information, corrupting data or inciting operational disruptions. Cyber security incidents can also result from unintentional events, such as the inadvertent release of sensitive information. Any such incident with respect to the Fund, any of its

service providers or an issuer of securities in which the Fund invests may affect business operations, potentially resulting in financial losses, privacy violations, transaction disruptions, legal and regulatory infractions and fines, reputational damage and compensation and/or additional compliance costs. There is no guarantee that any measures designed to reduce the risks associated with cyber security incidents will be effective, particularly since the Fund does not directly control the cyber security measures of service providers, financial intermediaries and issuers of securities in which it invests or with which it does business.

Political, Economic and Regulatory Risk Changes in economic and tax policies, interest rates, inflation rates and government instability, war or other political or economic actions or factors may have an adverse effect on the Fund's investments. Governmental and regulatory actions, including tax law changes, may have unexpected or adverse consequences on particular markets, strategies, or investments, including the liquidity of investments. These actions and other developments may also impact the Fund's ability to invest or remain invested in certain securities and other assets. Legislation or regulation may also change the way in which the Fund itself is regulated, and there can be no assurance that any new regulation will not adversely affect the Fund's ability to achieve its investment objective.

More detailed information about the Fund, its policies and risks can be found in the SAI.

Disclosure of Portfolio Holdings

A description of the Fund's policies and procedures with respect to the disclosure of its portfolio securities is available in the SAI. The Fund provides a complete list of its holdings on a quarterly basis in filings with the Securities and Exchange Commission (the "SEC"). The list currently appears in the Fund's annual and semi-annual reports to shareholders and will be filed with the SEC on Form N-CSR (with respect to the Fund's second and fourth fiscal quarters) and Form N-Q (with respect to the Fund's first and third fiscal quarters). The SAI, Form N-CSR and Form N-Q are available, free of charge, on the website of the SEC at www.sec.gov. The SAI is also available by contacting the Fund, c/o U.S. Bancorp Fund Services, LLC, at (888) GOTOGREEN (888-468-6473) and on the Fund's website at www.wintergreenfund.com.

Management

Investment Manager

Wintergreen Advisers, LLC, 333 Route 46 West, Suite 204, Mountain Lakes, New Jersey 07046, is the Fund's Investment Manager. The Investment Manager is registered as an investment adviser with the SEC. David J. Winters, the managing member of the Investment Manager and the portfolio manager of the Fund, has over thirty years of experience in investment advisory services, including management of registered investment companies. The Investment Manager also serves as an adviser to private investment funds. As of March 31, 2018, the Investment Manager had approximately \$390 million in assets under management.

Subject to policies adopted by the Board, the Investment Manager directs the purchase or sale of investment securities in the day-to-day management of the Fund's investment portfolio. The Investment Manager, at its own expense and without reimbursement from the Fund, furnishes office space and all necessary office facilities, equipment, and executive personnel for making the investment decisions necessary for managing the Fund and maintaining its organization. The Investment Manager is entitled to receive from the Fund an annual fee for managing the Fund's assets equal to 1.50% of the Fund's average daily net assets. The Investment Manager has agreed to waive, on a voluntary basis, a portion of its investment management fee payable by the Fund or reimburse the Fund to the extent necessary to ensure that total annual fund operating expenses (including investment management fees and other fees but excluding interest, taxes and brokerage expenses) for Investor Class shares and Institutional Class shares do not exceed 1.95% and 1.70%, respectively, of average daily net assets of such shares. Taking into account the voluntary fee waiver,

the Investment Manager received a net advisory fee of 1.41% of the Fund's average daily net assets for the fiscal year ended December 31, 2017. A discussion of the basis of the Board's approval of the investment advisory contract with the Investment Manager is available in the Fund's most recent annual report to shareholders for the fiscal year ended December 31, 2017.

Portfolio Manager

Mr. David J. Winters, the managing member of the Investment Manager, is primarily responsible for the management of the Fund's portfolio and has responsibility for the day-to-day management of the Fund. Mr. Winters has managed the Fund since its inception in 2005.

Prior to forming the Investment Manager in May 2005, Mr. Winters held various positions with Franklin Mutual Advisers, LLC, including, President, Chief Executive Officer, and Chief Investment Officer. Mr. Winters led the Mutual Series group of global and domestic equity value funds, including serving as portfolio manager of the Mutual Discovery Fund during the period beginning February 1, 2000, through May 10, 2005.

The SAI provides additional information about the portfolio manager's compensation, other accounts that he manages, and his ownership of Fund shares.

Other Service Providers

Forside Fund Services, LLC (the "Distributor"), is the distributor of the shares of the Fund, and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101.

U.S. Bancorp Fund Services, LLC (the "Transfer Agent") serves as the Fund's administrator, transfer agent and fund accountant and is located at 615 East Michigan Street, Milwaukee, Wisconsin 53202.

J.P. Morgan Chase Bank, N.A., the custodian of the Fund's assets, is located at 383 Madison Avenue, Floor 11, New York, New York 10179.

Understanding Expenses

The Fund pays for its expenses out of its own assets. The Investment Manager or other service providers may waive all or any portion of their fees and reimburse certain expenses of the Fund. Any fee waiver or expense reimbursement will increase investment performance of the Fund for the period during which the waiver or reimbursement is in effect.

Dividends, Distributions, and Shareholder Taxes

Income and Capital Gain Distributions The Fund intends to make distributions from its net investment income at least annually, such distributions to be payable in additional shares of the Fund or in cash. Capital gains, if any, may be distributed at least annually, in additional shares or in cash, at the election of the shareholder. The amount of distribution will vary, and there is no guarantee the Fund will pay either income dividends or a capital gain distribution.

Tax Considerations The Fund generally intends to operate in a manner such that it will not be liable for federal income tax. You will normally have to pay federal income tax, and any state or local income taxes, on the distributions you receive from the Fund, even if you reinvest them in additional shares. Distributions of net capital gains from the sale of investments that the Fund owned for more than one year and that are properly designated as capital gain dividends are taxable as long-term capital gains. Distributions of dividends to the Fund's non-corporate shareholders may be treated as "qualified dividend income," which may be taxed at reduced rates, if such distributions are derived from, and designated by the Fund as, "qualified dividend income" and provided that holding period and other requirements are met by both the shareholder

and the Fund. "Qualified dividend income" generally is income derived from dividends from U.S. corporations and "qualified foreign corporations." Other distributions by the Fund are generally taxable to you as ordinary income. Dividends declared in December and paid in January of the following year are taxable as if they had been paid the previous December. A distribution by the Fund reduces the net asset value ("NAV") of the Fund's shares by the amount of the distribution. If you purchase shares prior to a distribution, you are taxed on the distribution even though the distribution represents a return of a portion of your investment.

Investment income received by the Fund from sources within foreign countries may be subject to foreign income taxes withheld at the source. To the extent that the Fund is liable for foreign income taxes withheld at the source, the Fund intends, if possible, to operate so as to meet the requirements of the Internal Revenue Code of 1986, as amended, to "pass-through" to the Fund's shareholders credits for foreign income taxes paid (or to permit shareholders to claim a deduction for such foreign taxes), but there can be no assurance that the Fund will be able to do so. Furthermore, a shareholder's ability to claim a foreign tax credit or deduction for foreign taxes paid by the Fund may be subject to certain limitations imposed by the Code, as a result of which a shareholder may not be permitted to claim a credit or deduction for all or a portion of the amount of such taxes.

Under certain circumstances, if the Fund realizes losses (e.g. from fluctuations in currency exchange rates) after paying a dividend, all or a portion of the dividend may subsequently be characterized as a return of capital. Returns of capital are generally nontaxable, but will reduce a shareholder's basis in shares of the Fund. If that basis is reduced to zero (which could happen if the shareholder does not reinvest distributions and returns of capital are significant), any further returns of capital will be taxable as capital gains.

The sale of Fund shares is generally a taxable transaction for federal income tax purposes.

If you are neither a citizen nor resident of the United States, the Fund will withhold U.S. federal income tax at the rate of 30% on income dividends and other payments that are subject to such withholding. You may be able to arrange for a lower withholding rate under an applicable tax treaty if you supply the appropriate documentation required by the Fund.

The Fund may be required to withhold federal income tax ("backup withholding") from payments to you if:

- you fail to furnish your properly certified Social Security or other tax identification number,
- you indicate that you are subject to backup withholding, or
- the Internal Revenue Service ("IRS") informs the Fund that your tax identification number is incorrect or that backup withholding should apply.

These certifications are contained in the application that you complete and return when you open an account. The Fund must promptly pay to the IRS all amounts withheld. Therefore, it is usually not possible for the Fund to reimburse you for amounts withheld. You may, however, claim the amount withheld as a credit on your federal income tax return.

As required by regulation, the Fund will send you a statement that shows the tax status of distributions you received the previous year. For further information about the tax consequences of investing in the Fund, please see the SAI. Consult your tax adviser about the federal, state, and local tax consequences in your particular circumstances.

Conversion of Share Classes

A conversion from Investor Class shares to Institutional Class shares of the Fund or from Institutional Class shares to Investor Class shares of the Fund should generally not be a taxable exchange for federal income tax purposes. Please contact your tax adviser to discuss your particular circumstances.

Shareholder Information

This section discusses how to buy, sell, or redeem shares in the Fund.

Buying Shares

What You Need To Know When Buying Shares You may buy shares of the Fund each weekday that the NYSE is open at the NAV per share next calculated after the Fund receives your order in proper form.

“Proper form” means that your purchase request includes a completed account application, subsequent investment slip or the name of the Fund and your account number, payment in full to support your investment, and any other documentation that may be required. All purchase requests received in proper form before the close of the NYSE (generally 4:00 p.m., Eastern time) will be processed on that same day. Purchase requests received after the close of the NYSE (generally 4:00 p.m., Eastern time) will receive the next business day’s NAV per share. The Fund reserves the right to refuse to accept any account application or any purchase request. The Investment Manager may, in its discretion, waive or reduce the applicable minimum investment amounts.

Minimum Individual Purchase Amount:

	Minimum Purchase Amount	
	Investor Class	Institutional Class
New Accounts		
Regular Accounts	\$10,000	\$100,000
Automatic Investment Plans	\$10,000	\$100,000
IRAs	\$ 3,000	\$100,000
Coverdell ESAs	\$ 2,000	\$100,000
Existing Accounts		
Regular Accounts	\$ 1,000	\$ 1,000
Automatic Investment Plans	\$ 100	\$ 1,000
IRAs	\$ 1,000	\$ 1,000
Coverdell ESAs	\$ 1,000	\$ 1,000

PLEASE NOTE THAT YOU MAY ONLY BUY SHARES OF THE FUND IF THEY ARE ELIGIBLE FOR SALE IN YOUR STATE OR JURISDICTION.

Retirement and Employee Benefit Plans

Shares are also available to:

- SEPs, traditional and ROTH IRAs, and Coverdell ESAs (the minimums listed in the table above apply);
- SAR-SEPs, SIMPLE IRAs, and individual 403(b) plans; and
- all 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans, defined benefit plans, and non-qualified deferred compensation plans where plan level or omnibus accounts are held on the books of the Fund (group retirement plans) with assets of \$1,000,000 or more.

Distribution and Service (12b-1) Fees Pursuant to the Fund’s Rule 12b-1 distribution and/or shareholder services plan (the “12b-1 plan”), the Fund may pay a fee to one or more persons or entities, including affiliates of the Fund, the Investment Manager and/or the Distributor, for rendering distribution and shareholder services relating to the Fund’s Investor Class shares, and for bearing any related expenses, with respect to the Investor Class shares of the Fund. The aggregate fee amount will not exceed 0.25% of the

Fund's average daily net assets attributable to its Investor Class shares. Because these fees are paid out of the assets of the Investor Class shares of the Fund on an on-going basis, over time, these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. The Institutional Class shares are not subject to the 12b-1 plan.

Multiple Classes The Fund currently offers two classes of shares: Institutional Class and Investor Class. The different classes of shares represent investments in the same portfolio of securities, but are subject to different expenses. For example, Investor Class shares are subject to the 12b-1 fee described above while the Institutional Class shares are not subject to a 12b 1 fee. Share classes are also subject to different investment minimums.

Payments to Financial Advisers and Their Firms As permitted, the Investment Manager, the Fund or any of the Fund's agents may enter into arrangements with financial intermediaries that market and sell shares of the Fund, through which arrangements investors may purchase or redeem Fund shares. These financial intermediaries receive compensation for selling shares of the Fund and for providing shareholder record keeping, communication and/or other shareholder services. This compensation is paid from various sources, including any 12b-1 fee that the Investor Class of the Fund may pay for such services relating to Investor Class shares. In addition, the Investment Manager or other Fund agent, as applicable, may, at its own expense, compensate financial intermediaries in connection with the sale or expected sale of Fund shares. In the case of payments received by financial intermediaries that employ a financial adviser, the individual financial adviser may receive some or all of the amounts paid to the financial intermediary that employs him or her. Payments to financial intermediaries may create an incentive for the financial institution to recommend that you purchase Fund shares.

What is a Financial Intermediary?

A financial intermediary is a firm that receives compensation for selling shares of the Fund and/or provides services to the Fund's shareholders. Financial intermediaries may include, among others, your broker, your financial planner or adviser, banks, pension plan consultants, and insurance companies. In addition other brokerage firms and other companies that provide services of the type described above may receive fees from the Fund, the Investment Manager or the Distributor in respect of such services. These companies may also be appointed as agents for or authorized by the Fund to accept on their behalf purchase and redemption requests that are received in proper form. Subject to Fund approval, certain of these companies may be authorized to designate other entities to accept purchase and redemption orders on behalf of the Fund.

Although the Fund may use brokers and dealers who sell shares of the Fund to effect portfolio transactions, the Fund does not consider the sale of Fund shares as a factor when selecting brokers or dealers to effect portfolio transactions.

Information About Your Account

The Fund is a no-load fund, which means that you may purchase or redeem shares directly at the NAV per share without paying a sales charge. However, you may be charged a fee or have higher investment minimums if you buy or sell shares through a securities dealer, bank, or financial institution.

Opening An Account You may purchase shares by check, Electronic Funds Transfer via Automated Clearing House ("ACH"), or wire. All checks must be made payable in U.S. dollars drawn on U.S. financial institutions and should be made payable to "Wintergreen Fund, Inc." The Fund will not accept payment in cash, coin, money orders, or monetary instruments, including, but not limited to, traveler's checks and negotiable instruments that are in bearer form. The Fund will not accept postdated checks or any conditional order or payment. The Fund will accept a bank check or a third party check for purposes of an account transfer or

retirement account rollover, provided that such check is made payable for the benefit of the account holder, is issued by a U.S. financial institution, and complies with the minimum investment amount for the Investor Class or Institutional Class. Absent the granting of an exception consistent with the Fund's Anti-Money Laundering Compliance Program, the Fund will not accept any other third party checks (except as described above), Treasury checks, credit card checks, traveler's checks, or starter checks for the purchase of shares.

The Transfer Agent will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any payment that is returned. It is the policy of the Fund not to accept applications under certain circumstances or in amounts considered disadvantageous to shareholders. The Fund reserves the right to reject any application.

Anti-Money Laundering Program

Customer identification and verification are part of the Fund's overall obligation to deter money laundering under Federal law. The Fund has adopted an Anti-Money Laundering Compliance Program designed to prevent the Fund from being used for money laundering or the financing of terrorist activities. In this regard, the Fund reserves the right, to the extent permitted by law, to (i) refuse, cancel, or rescind any purchase or exchange order, (ii) freeze any account and/or suspend account services, or (iii) involuntarily close an account in cases of threatening conduct or suspected fraudulent or illegal activity. These actions will be taken when, in the sole discretion of Fund management, they are deemed to be in the best interest of the Fund or in cases when the Fund is requested or compelled to do so by governmental or law enforcement authority. If an account is closed at the request of governmental or law enforcement authority, the shareholder may not receive proceeds of the redemption if the Fund is required to withhold such proceeds.

Account Application and Customer Identity and Verification

To help the government fight the funding of terrorism and money laundering activities, Federal law requires financial institutions to obtain, verify, and record information that identifies each person who opens an account.

When you open an account, the Fund will ask for your name, address, date of birth, social security number, and other information or documents that will allow us to identify you. Effective May 11, 2018, if you are opening the account in the name of a legal entity (e.g., partnership, limited liability company, business trust or corporation), you must also supply the identity of the entity's beneficial owners. Mailing addresses containing only a P.O. Box will not be accepted.

If you do not supply the required information, the Fund will attempt to contact you or, if applicable, your broker or financial adviser. If the Fund cannot obtain the required information within a timeframe established in the Fund's sole discretion, your application will be rejected. The Fund reserves the right to reject any application for any reason.

When your application is in proper form and includes all required information, your application will normally be accepted and your order will be processed at the NAV per share next calculated after receipt of your application in proper form. The Fund may reject your application under its Anti-Money Laundering Program. If your application is accepted, the Fund will then attempt to verify your identity using the information you have supplied and other information about you that is available from third parties, including information available in public and private databases, such as consumer reports from credit reporting agencies.

The Fund will try to verify your identity within a timeframe established in the Fund's sole discretion. If the Fund cannot do so, the Fund reserves the right to close your account at the NAV per share next calculated after the Fund decides to close your account and to remit proceeds to you via check, but only if initial payment is completed. If your account is closed, you may be subject to a gain or loss on Fund shares and will be subject to any related taxes.

You must be a U.S. Citizen or an alien residing in the U.S. or a U.S. Territory (including overseas U.S. military or diplomatic addresses) with a valid U.S. Taxpayer Identification Number to open an account. Entities must be based in the U.S. or a U.S. Territory and have a valid U.S. Taxpayer Identification Number to open an account.

Limitations on Purchases and Market Timing

Market Timing The Board has adopted policies and procedures with respect to frequent purchases and redemptions of Fund shares by Fund shareholders. It is the Fund's policy to discourage short-term or frequent trading, often referred to as "market timing." Frequent trading in the Fund, such as by traders seeking short-term profits from market momentum, time zone arbitrage and other timing strategies, may interfere with the management of the Fund's portfolio and result in increased administrative and brokerage costs and potential dilution in the value of shares. As money is moved in and out, the Fund may incur expenses related to buying and selling portfolio securities and these expenses are borne by Fund shareholders.

Specifically, focus is placed on identifying redemption transactions that may be harmful to the Fund or its shareholders if they are frequent. These transactions are analyzed for offsetting purchases within a predetermined period of time. If frequent trading trends are detected, an appropriate course of action will be determined by consideration of, among other things, shareholder account transaction history. The Fund reserves the right to restrict, reject, or cancel within one business day, without any prior notice, any purchase order, including transactions that, in the judgment of the Investment Manager, represent excessive trading, may be disruptive to the management of the Fund's portfolio, may increase the Fund's transaction costs, administrative costs or taxes, and those that may otherwise be detrimental to the interests of the Fund and its shareholders. The Fund also reserves the right to refuse, restrict, or cancel purchase orders not accompanied by payment, and to take such other actions in response to potential market timing activity as are described below. The Fund's right to cancel or revoke such purchase orders would be limited to within one business day following receipt by the Fund of such purchase orders.

Market Timing Consequences If information regarding your trading activity in the Fund is brought to the attention of the Investment Manager and based on that information the Fund or the Investment Manager in its sole discretion concludes that your trading may be detrimental to the Fund, the Fund may temporarily or permanently bar your future purchases in the Fund or, alternatively, may limit the amount, number or frequency of any future purchases and/or the method by which you may request future purchases and redemptions (including purchases and/or redemptions by an exchange or transfer between the Fund and any other mutual fund). The Fund may refuse to sell shares to persons determined by the Fund to be potential market timers, even if any pre-determined limitations established on behalf of the Fund have not been reached.

In considering an investor's trading activity, the Fund may consider, among other factors, the investor's trading history both directly and, if known, through financial intermediaries, in the Fund, in other mutual funds, or in accounts under common control or ownership.

Due to its investment in the securities of foreign issuers, which may have more limited trading markets, the Fund may be subject to greater risk of market timing activity than funds investing in securities of certain domestic issuers.

Market Timing and Redemptions Through Financial Intermediaries All investors are subject to the Fund's policies and procedures regarding frequent trading, (including its policies described below with respect to the application of the 2.00% short-term trading redemption fee), whether they are direct shareholders in the Fund or are investing indirectly in the Fund through a financial intermediary, such as a broker-dealer, a bank, an insurance company separate account, a financial adviser, administrator or trustee of an IRS recognized tax-deferred savings plan such as a 401(k) retirement plan and a 529 college savings plan

that maintains a master account (an “Omnibus Account”) with the Fund for trading on behalf of its customers. An Omnibus Account is an account held in the name of a broker-dealer, where the individual purchasers of the Fund shares are customers of the broker-dealer, rather than the Fund. Similarly, if the Fund sells shares to a qualified retirement plan, the plan, and not its participants, would be the Fund’s customer.

Risks From Market Timers Depending on various factors, including the size of the Fund, the amount of assets the Investment Manager typically maintains in cash or cash equivalents, the dollar amount and number and frequency of trades and the types of securities in which the Fund typically invests, short-term or frequent trading may interfere with the efficient management of the Fund’s portfolio, increase the Fund’s transaction costs, administrative costs, taxes, and/or impact Fund performance.

In addition, to the extent that the nature of the Fund’s portfolio holdings exposes the Fund to “arbitrage market timers,” the value of the Fund’s shares may be diluted if redeeming shareholders receive proceeds (and buying shareholders receive shares) based upon NAVs which do not reflect appropriate fair value prices. Arbitrage market timing occurs when an investor seeks to take advantage of the possible delay between the change in the value of a mutual fund’s portfolio holdings and the reflection of the change in the Fund’s NAV. Since the Fund may invest significantly in foreign securities, it may be particularly vulnerable to arbitrage market timing. Arbitrage market timing in foreign investments may occur because of time zone differences between the foreign markets on which the Fund’s international portfolio securities trade and the time as of which the Fund’s NAV is calculated. Arbitrage market timers may purchase shares of the Fund based on events occurring after foreign market closing prices are established, but before calculation of the Fund’s NAV. One of the objectives of the Fund’s fair value pricing procedures is to minimize the possibilities of this type of arbitrage market timing (please see “Valuation – Foreign Securities – Potential Impact of Time Zones and Market Holidays”).

Since the Fund may invest significantly in securities that are, or may be, restricted, unlisted, traded infrequently, thinly traded or relatively illiquid (collectively, “relatively illiquid securities”), it may be particularly vulnerable to arbitrage market timing. An arbitrage market timer may seek to take advantage of a possible differential between the last available market prices for one or more of those relatively illiquid securities that are used to calculate the Fund’s NAV and the latest indications of market values for those securities. One of the objectives of the Fund’s fair value pricing procedures is to minimize the possibilities of this type of arbitrage market timing (please see “Fair Valuation – Individual Securities”).

The Fund is currently using several methods to reduce the risks associated with market timing. These methods include:

- Committing staff to selectively review on a continuous basis recent trading activity in order to identify trading activity that may be contrary to the Fund’s policies regarding frequent trading;
- Assessing a 2.00% redemption fee for short-term trading; monitoring potential price differentials following the close of trading in foreign markets and changes in indications of value for relatively illiquid traded securities to determine whether the application of fair value pricing procedures is warranted; and reviewing reports issued by omnibus account holders that detail any potential market-timing issues. If the Fund determines that certain of these transactions rise to the level of market-timing, the accounts in which those transactions have taken place may be immediately “blocked” and future purchases or exchange activity with respect to Fund shares will be restricted or eliminated as the Fund shall determine.

Though certain of these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund’s shareholders. There is no assurance that the Fund or its agents will gain access to any or all information necessary to detect market timing in Omnibus Accounts. While the Fund will seek to

take actions (directly and with the assistance of financial intermediaries) designed to detect and deter market timing, there can be no guarantee that such trading activity can be minimized or completely eliminated.

Revocation of Market Timing Trades Transactions placed in violation of the Fund's policies regarding frequent trading are not necessarily deemed accepted by the Fund and may be canceled or revoked by the Fund following receipt by the Fund. The Fund's right to cancel or revoke such purchase orders would be limited to within one business day following receipt by the Fund of such purchase orders.

Redemption Fee

Redemption Fee Assessment You may redeem shares of the Fund at the NAV per share minus any applicable redemption fee. Accordingly, the redemption proceeds may be lower than the redemption request. A short-term trading redemption fee will be assessed on any Fund shares that are sold (by redemption, whether voluntary or involuntary, unless such involuntary redemption is because you have a low balance) sixty (60) calendar days or less following their purchase date. This redemption fee will equal 2.00% of the amount redeemed (using standard rounding criteria). To calculate redemption fees, after first redeeming any shares associated with reinvested distributions, the Fund will use the first-in-first-out method to determine the holding period. Under this method, the date of redemption will be compared with the earliest purchase date of shares held in the account. The redemption fee may be collected by deduction from the redemption proceeds.

This redemption fee is imposed to discourage short-term trading and is paid to the Fund to help offset any cost associated with such short-term trading. This redemption fee is not intended to accommodate short-term trading and the Fund will monitor the assessment of redemption fees against your account. Based on the frequency of redemption fees assessed against your account in the Fund, the Investment Manager may in its sole discretion determine that your trading activity may be detrimental to the Fund as described in the section entitled "Limitations of Purchases and Market Timing" above and elect to (i) reject or limit the amount, number, frequency or method for requesting future purchases into the Fund and/or (ii) reject or limit the amount, number, frequency or method for requesting future redemptions out of the Fund. For waivers of the redemption fee for other Mutual Funds and certain comprehensive fee programs where the beneficial owner has limited investment discretion, the fee waiver must be discussed with the Fund and setup appropriately with the Transfer Agent. Depending on the type of account a waiver can be placed at the time of account setup or it may need to be done at the time of redemption.

Waiver/Exceptions/Changes The redemption fee is mandatory and may only be waived upon the death of the shareholder for which a redemption is required or as otherwise required by applicable law. The redemption fee may not apply to redemptions by other mutual funds, Omnibus Account owners, and certain comprehensive fee programs where the beneficial owner has limited investment discretion with respect to its shares in the Fund. In addition, the Fund reserves the right to modify or eliminate the redemption fee or waivers at any time. You will receive 60 days notice of any material changes, unless otherwise provided by law.

Limitations On Collection Currently, the Fund is very limited in its ability to ensure that the redemption fee is assessed by financial intermediaries on behalf of their customers. For example, where a financial intermediary is not able to determine if the redemption fee applies and/or is not able to assess or collect the fee, or omits to collect the fee at the time of a redemption, the Fund will not receive the redemption fee. Further, if Fund shares are redeemed by a financial intermediary at the direction of its customer(s), the Fund may not know: (i) whether a redemption fee is applicable; and/or (ii) the identity of the customer who should pay the redemption fee.

Certain financial intermediaries that collect a redemption fee on behalf of the Fund from applicable customer accounts may not be able to assess a redemption fee under certain circumstances due to operational limitations (*i.e.*, on Fund shares transferred to the Financial Institution and subsequently liquidated). Customers purchasing shares through a financial intermediary should contact the institution or refer to the

customer's account agreement or plan document for information about how the redemption fee for transactions for the financial intermediary's omnibus account or the customer's account is treated and about the availability of exceptions to the imposition of the redemption fee.

How to Invest in the Fund

Opening an Account	Adding to an Account
<p>By Mail</p> <ul style="list-style-type: none"> • Complete the application • Make check payable to "Wintergreen Fund, Inc." • Mail application and check to: Wintergreen Fund, Inc. c/o U.S. Bancorp Fund Services, LLC, P.O. Account Requirements For further information regarding the Fund's requirements for opening and sending instructions for individual, sole proprietorship, and joint accounts, as well as business entity and trust accounts, please call (888) GOTOGREEN (888-468-6473).

Canceled or Failed Payments The Fund accepts checks and ACH transfers at full value subject to collection. If the Fund does not receive your payments for shares or you pay with a check or ACH transfer that does not clear, your purchase will be canceled. You will be responsible for any losses or expenses incurred by the Fund or the Transfer Agent, and the Fund may redeem shares you own in the account (or another identically registered account that you maintain with the Transfer Agent) as reimbursement. You will also be assessed a \$25 service fee for any payment that does not clear. The Fund and its agents have the right to reject or cancel any purchase due to nonpayment.

Future Trade Date Requests The Fund does not accept requests to hold a purchase, redemption, or exchange transaction for a future date.

Investors Without a U.S. Address The Fund is currently not accepting subscriptions from investors that do not have a valid U.S. or U.S. Territory address (including overseas U.S. military or diplomatic addresses).

- For most account transactions
- For literature requests

Automatic Investment Plan This plan offers a convenient way for you to invest in the Fund by automatically transferring money from your checking or savings account each month to buy shares. In order to participate in the Automatic Investment Plan, your financial institution must be a member of the ACH network. To sign up, complete the appropriate section of your account application attach a voided check or savings deposit slip and mail it to the Fund's Transfer Agent at Wintergreen Fund, Inc., c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701. If you are opening a new account, please include the minimum initial investment (please see the section entitled "Shareholder Information – Minimum Individual Purchase Amount") with your application. Any request to change or terminate your Automatic Investment Plan should be submitted to the Transfer Agent five calendar days prior to the effective date.

Distribution Options You may reinvest distributions you receive from the Fund in an existing account in the Fund. You also can have your distributions deposited in a bank account or mailed by check. Deposits to a bank account may be made by ACH. Please indicate on your application the distribution option you have chosen, otherwise we will reinvest your distributions in the Fund. You may change your dividend and capital gain distribution election in writing or by calling the Transfer Agent in advance of the next distribution. If you elect to receive distributions and/or capital gains in cash, and the U.S. Postal Service cannot deliver the check, or if a check remains outstanding for six months, the Fund reserves the right to reinvest the distribution check in your account, at the Fund's current NAV, and to reinvest all subsequent distributions.

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents. Therefore, deposit in the mail or with such services, or receipt at the Transfer Agent's post office box, of purchase orders or redemption requests does not constitute receipt by the Transfer Agent of the Fund. The

timing of the receipt of a purchase order or redemption request is determined by the Transfer Agent based on when the order or request is received at the Transfer Agent's offices.

Telephone/Online Privileges You will receive telephone/online privileges when you open your account, allowing you to obtain or view your account information, and conduct a number of transactions by phone or online, including: buy or sell shares of the Fund; use electronic funds transfer to buy or sell shares of the Fund.

To view your account information or request online transactions, you will first need to register for these services at the shareholder section of our website at www.wintergreenfund.com. You will be asked to accept the terms of an online agreement(s) and establish a password for online services. Using our shareholder website means you are consenting to sending and receiving personal financial information over the Internet, so you should be sure you are comfortable with the associated risks.

Neither the Fund nor the Transfer Agent will be liable for following instructions for telephone or Internet transactions that they reasonably believe to be genuine, provided reasonable procedures are used to confirm the genuineness of the instructions, but may be liable for unauthorized transactions if they fail to follow such procedures. These procedures include requiring some form of personal identification or personalized security codes, passwords or other information prior to acting upon the telephone or Internet instructions and recording all telephone calls. To help safeguard your account, keep your password confidential and verify the accuracy of your confirmation statements immediately after you receive them. Contact us immediately if you believe someone has obtained unauthorized access to your account or password. Telephone trades must be received by or prior to market close. Certain methods of contacting us (such as by phone or by Internet) may be unavailable or delayed during period of unusual market activity. Please allow sufficient time to place your telephone transaction.

You can decline telephone buy or sell privileges on your account application, or choose not to register for online privileges. If you have telephone/online privileges on your account and want to discontinue them, please contact us for instructions. You may reinstate these privileges at any time in writing, including online registration with respect to online privileges.

Security Considerations You may give up some level of security by choosing to buy or sell shares by telephone rather than by mail. The Fund uses procedures designed to give reasonable assurance that telephone instructions are genuine, including recording the transactions, testing the identity of the shareholder placing the order and sending prompt written confirmation of transactions to the shareholder of record. If these procedures are followed, the Fund and its service providers are not liable for acting upon instructions communicated by telephone that they believe to be genuine. If an account has more than one owner or authorized person, the Fund will accept telephone instructions from any one owner or authorized person.

Systematic Withdrawal Plan The Fund offers a Systematic Withdrawal Program ("SWP") whereby shareholders or their representatives may request a redemption in a predetermined amount each month, calendar quarter, or annually. Proceeds can be sent via check to the address on the account or proceeds can be sent by electronic funds transfer via the ACH network to your bank account. To start this program, your account(s) must have Fund shares with a value of at least \$100,000 for Institutional Class shares or \$10,000 for Investor Class shares. If the Institutional Class account(s) subject to the Systematic Withdrawal Plan fall below the Institutional Class minimum amount of \$100,000, then the account(s) may be converted to Investor Class shares as described in the section entitled "Converting from Institutional Class to Investor Class Shares." The minimum amount that may be withdrawn is \$50. This program may be terminated or modified by the Fund at any time. Shareholders may change or terminate the SWP by communicating in writing or by telephone to the Transfer Agent no later than five days before the next scheduled withdrawal.

A withdrawal under the SWP involves a redemption of Fund shares, and may result in a gain or loss for federal income tax purposes. To establish the SWP, contact the Fund at (888) GOTO GREEN (888-468-6473).

Householding In an effort to decrease costs, the Fund will reduce the number of duplicate prospectuses, annual reports, and semi-annual reports you receive by sending only one copy of each to those addresses shared by two or more accounts. Call toll-free at (888) GOTOGREEN (888-468-6473) to request individual copies of these documents or if your shares are held through a financial institution please contact them directly. The Fund will begin sending individual copies thirty days after receiving your request. This policy does not apply to account statements.

THE FUND RESERVES THE RIGHT TO REJECT ANY PURCHASE ORDER FOR ANY REASON, AND TO LIMIT OR SUSPEND THE OFFERING OF ITS SHARES. THE INVESTMENT MANAGER MAY DECIDE TO SUSPEND THE OFFERING OF SHARES IF IT DETERMINES THAT ANY INCREASE IN THE NET ASSETS OF THE FUND THROUGH SUBSCRIPTIONS WOULD BE DETRIMENTAL TO THE INTERESTS OF THE FUND OR EXISTING SHAREHOLDERS.

Selling Shares

You can sell your shares on any weekday that the Fund is open for business. Please keep in mind that a redemption fee may apply.

What You Need To Know When Selling Shares You may sell your shares on any day the Fund is open for business. The Fund processes redemption orders promptly. Redemption proceeds will not be sent to you until your shares have been paid for in full. This means if you purchased your shares by check or electronic funds transfer through the ACH network, the redemption payment will be delayed until the Fund has received acknowledgment to its satisfaction that the purchase has cleared. This could take up to 15 calendar days. In times of drastic economic or market conditions, you may have difficulty selling shares by telephone.

Once your request has been actually received by the Fund in proper form, the Fund will redeem your shares at the next determined NAV per share immediately following receipt of the redemption request. Subject to the foregoing, the Fund generally pays redemption proceeds within seven days after the request is actually received. For redemptions paid in cash, the Fund typically expects to meet redemption requests using the Fund's then-existing holdings of cash or cash equivalents. Subject to market conditions and other considerations, at times, such as during stressed market conditions, the Fund may use proceeds from the sale of securities to meet redemption requests. Unless otherwise prohibited by law, the Fund also reserves the right to pay redemptions in kind, using portfolio securities to pay redemption proceeds, as described below. Payment is sent to the address of record.

Selling Your Shares

By Phone Unless you declined the telephone redemption option on your account application, you have no limitations on the amounts that you may redeem by telephone by calling (888) GOTOGREEN (888-468-6473). Shares held by retirement plans may not be redeemed by telephone. You may elect to have telephone redemption proceeds sent by check to your address of record, by wire to your bank account of record, or funds may be sent via electronic funds transfer through the ACH network to your pre-determined bank account. Proceeds may be wired and are subject to a \$15 fee paid by the investor. You do not incur any charge for proceeds sent via the ACH system and credit is usually available within 2-3 days.

By Mail Send a letter of instruction including the account number, the dollar value or number of shares, and any necessary signature guarantees to: Wintergreen Fund, Inc. c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701.

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents. Therefore, deposit in the mail or with such services, or receipt at the Transfer Agent's post office box, of purchase orders or redemption requests does not constitute receipt by the Transfer Agent of the Fund. The timing of the receipt of a purchase order or redemption request is determined by the Transfer Agent based on when the order or request is received at the Transfer Agent's offices.

By Systematic Withdrawal Plan For further information on a systematic withdrawal plan, please call (888) GOTOGREEN (888-468-6473).

Through A Financial Professional Contact your financial professional.

Signature Guarantees A signature guarantee from either a Medallion program member or a non-Medallion program member of each owner must be provided:

- If the request is to change ownership on your account;
- When redemption proceeds are payable or sent to any person, address, or bank account not on record;
- When a redemption request has been received by the Transfer Agent, and the address of the account associated with the request has been changed within the previous 30 calendar days.

In addition to the situations described above, the Fund and/or the Transfer Agent reserve the right to require a signature guarantee or other acceptable signature verification in other instances based on the circumstances relative to the particular situation. The Fund reserves the right to waive any signature requirement in its discretion. Non-financial transactions including establishing or modifying certain services on an account may require a signature guarantee, signature verification from a Signature Validation Program member or other acceptable form of authentication from a financial institution source.

In-Kind Redemptions Although the Fund expects to make redemptions in cash, it reserves the right to make the redemption in-kind. These redemptions "in-kind" usually occur when the amount to be redeemed is large enough to affect the Fund's operations (for example, if it represents more than 1% of the Fund's net assets). This is done to protect the interests of the Fund's remaining shareholders. An in-kind payment means you receive portfolio securities rather than cash. If this occurs, you will incur transaction costs when you subsequently sell the portfolio securities that you received.

IRA Redemption Request Shareholders who have an IRA or other retirement plan must indicate on their redemption request whether or not to withhold federal income tax. Redemption requests failing to indicate an election not to have tax withheld will generally be subject to 10% withholding.

Shareholder Information, Inactive Accounts and Unclaimed Property It is important that the Fund maintain a correct address for each shareholder. An incorrect address may cause a shareholder's account statements and other mailings to be returned to the Fund. Based upon statutory requirements for returned mail, the Fund will attempt to locate the shareholder or rightful owner of the account. If the Fund is unable to locate the shareholder, then it will determine whether the shareholder's account can legally be considered abandoned. Your mutual fund account may be transferred to the government of your state of residence if no activity occurs within your account during the "inactivity period" specified in your state's abandoned property laws. The Fund is legally obligated to escheat (or transfer) abandoned property to the appropriate state's unclaimed property administrator in accordance with statutory requirements. The shareholder's last known address of record determines which state has jurisdiction.

If you own Fund shares directly with the Fund (*i.e.*, the account is not held through a broker or other intermediary) please contact the Fund at least annually to ensure that your account remains in active status. You may contact the Fund online at www.wintergreenfund.com, by calling the Fund toll-free at 1-888-468-6473,

or by writing to the Fund at P.O. Box 701, Milwaukee, WI 53201-0701. If you own Fund shares through a broker or other intermediary, please contact your intermediary for account maintenance questions.

If you are a resident of the state of Texas, you may designate a representative to receive notifications that, due to inactivity, your mutual fund account assets may be delivered to the Texas Comptroller. Please contact the Transfer Agent if you wish to complete a Texas Designation of Representative form.

Account Policies

Calculating Share Price The price at which you buy or sell Fund shares is the NAV per share. The NAV per share is calculated by dividing the Fund's net assets by the number of its shares outstanding. Due to the fact that different expenses are charged to the Institutional Class and Investor Class shares of the Fund, the NAV of the two classes of the Fund will vary. The NAV per share is calculated at the close of regular trading of the NYSE (normally 4:00 p.m. Eastern time) each business day the NYSE is open. It is not calculated on days the NYSE is closed for trading. The NYSE may also be closed on national days of mourning or due to natural disaster or other extraordinary events or emergency. The price for a purchase or redemption of Fund shares is the NAV per share next calculated after the Fund's actual receipt of your request in proper form. The share price is determined by adding the value of the Fund's investments, cash, and other assets, deducting liabilities, and then dividing that amount by the total number of shares outstanding. The Fund may change the time it calculates its NAV per share in an emergency.

The Fund's assets are generally valued at their market value using valuations provided by independent pricing services. If market prices are unavailable, or if an event occurs after the closing of the trading market that materially affects the values, assets may be valued at their fair value. If the Fund holds securities listed primarily on a foreign exchange that trades on days when the Fund is not open for business, the value of shares may change on days that you cannot buy or sell shares. Requests to buy and sell shares are processed at the NAV per share next calculated after we receive your request in proper form.

Generally, trading in corporate bonds, U.S. Government securities, money market instruments, and foreign securities is substantially completed each day at various times before the close of the NYSE. The value of these securities used in computing the NAV is determined as of such times. Occasionally, events affecting the values of these securities may occur between the times at which they are determined and the close of the NYSE that will not be reflected in the computation of the NAV. The Fund may rely on third party pricing vendors to monitor for events materially affecting the value of these securities during this period. If an event occurs the third party pricing vendors will provide revised values to the Fund.

The Board will maintain a Valuation Committee established for the purpose of ensuring that the securities and other assets and liabilities of the Fund are valued properly, fairly, and in accordance with the Fund's Statement of Procedures for the Valuation of Portfolio Securities, as may be amended from time to time, which procedures were adopted for the Fund and approved by the Board. The Valuation Committee will meet when necessary.

Fair Valuation – Individual Securities Since the Fund may invest in securities, including derivatives, that are restricted, unlisted, traded infrequently, thinly traded, or relatively illiquid, there is the possibility of a differential between the last available market or other prices for one or more of those securities and the latest indications of market values for those securities. The Fund has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available (such as certain restricted or unlisted securities and private placements) or which may not be reliably priced (such as in the case of trade suspensions or halts, price movement limits set by certain foreign markets, and thinly traded or illiquid securities). Some methods for valuing these securities may include: fundamental analysis (earnings

multiple, etc.), matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities.

The application of fair value pricing procedures represents a good faith determination based upon specifically applied procedures. There can be no assurance that the Fund could obtain the fair value assigned to a security if it were able to sell the security at approximately the time at which the Fund determines its NAV per share.

Exchange Traded Securities Securities traded or dealt on one or more securities exchange (whether domestic or foreign, including the National Association of Securities Dealers' Automated Quotation System (NASDAQ)) and not subject to restrictions against resale shall be valued:

- (i) at the last quoted sales price or, in the absence of a sale,
- (ii) at the mean of the last bid and ask prices.

Non-Exchange Traded Securities Securities not traded or dealt on any securities exchange for which OTC market quotations are readily available generally shall be valued at the mean of the current bid and ask prices.

Money Market Instruments Notwithstanding anything to the contrary, money market instruments with a remaining maturity of 60 days or less may be valued at amortized cost (purchase price or last valuation, as applicable, adjusted for accretion of discount or amortization of premium) unless the Investment Manager believes another valuation is more appropriate. Municipal daily or weekly variable rate demand instruments may be priced at par plus accrued interest.

U.S. Government securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued principally using dealer quotations.

Securities Traded on More Than One Exchange If a security is traded or dealt on more than one exchange, or on one or more exchanges and in the OTC market, quotations from the market in which the security is primarily traded shall be used. For an option, the last quoted sale on an exchange or board of trade on which the option is traded shall be used. In the absence of a sale, the mean between the highest bid and lowest ask prices at the close of the exchanges and/or boards of trade on which the option trades will be used.

Currencies and Forward Contracts The value of foreign currencies shall be translated into U.S. dollars based on the foreign exchange rate in effect at the close of the NYSE (normally 4:00 p.m. Eastern time) on the date of valuation. If the foreign exchange rate in effect at the close of the NYSE is not available from the Fund's pricing agent, the currency may be valued using the foreign exchange rate standard provided by the Fund's pricing agent. Forward contracts are presented at fair value measured by the difference between the forward exchange rates at the dates of entry into the contracts and the forward exchange rates at the reporting date.

Options The current market value of any option listed for trading on a securities exchange or board of trade shall be valued at the last quoted sale price or, in the absence of a sale, at the mean of the highest bid and lowest ask prices across the exchanges on which the option is traded. Options not listed for trading on a securities exchange or board of trade for which OTC market quotations are readily available shall be valued at the mean of the highest quoted bid and lowest ask prices. Over-the-counter derivatives for which bid and ask prices are not readily available or are determined to be unreliable shall generally be valued at the value provided by an independent pricing agent or other reliable third party.

Security Valuation – Foreign Securities – Computation of U.S. Equivalent Value The Fund generally determines the value of a foreign security as of the close of trading on the foreign stock exchange on which the security is primarily traded, or as of the close of trading on the NYSE, if earlier. If no sale is reported, the

foreign security will be valued at the mean of the last bid and ask prices. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE (normally 4:00 p.m. Eastern time) on the day that the value of the foreign security is determined. If the foreign exchange rate in effect at the close of the NYSE is not available from the Fund's pricing agent, the security may be valued using the foreign exchange rate standard provided by the Fund's pricing agent. Occasionally, events (such as repatriation limits or restrictions) may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Board.

Valuation – Foreign Securities – Potential Impact of Time Zones and Market Holidays Trading in securities on foreign exchanges and OTC markets, such as those in Europe and Asia, may be completed well before the Fund calculates its NAV on each business day. In addition, trading in foreign portfolio securities generally, or in securities markets in a particular country or countries, may not take place on each business day. Furthermore, trading takes place in various foreign markets on days that are business days, and on which the Fund's NAV is not calculated. Thus, the calculation of the Fund's NAV does not take place contemporaneously with the determination of the prices of many of the foreign portfolio securities used in the calculation.

Occasionally, events occur between the time at which trading in a foreign security is last completed and the time at which the Fund calculates its NAV on each business day. These events might call into question the availability (including the reliability) of the value of a foreign portfolio security held by the Fund. As a result, the Fund may be susceptible to what is referred to as "time zone arbitrage." Certain investors in the Fund may seek to take advantage of discrepancies in the value of the Fund's portfolio securities as determined by the foreign market at its close and the latest indications of value attributable to the portfolio securities at the time the Fund's NAV is computed. Trading by these investors, often referred to as "arbitrage market timers," may dilute the value of the Fund's shares, if such discrepancies in security values actually exist.

To attempt to minimize the possibilities for time zone arbitrage, the Investment Manager monitors market events after the close of trading in foreign stock markets. If the Investment Manager believes a market event has occurred that might call into question the availability (including the reliability) of the values of foreign securities between the times at which they are determined and the close of the NYSE, such foreign securities may be valued using the Fund's fair value procedures. The intended effect of applying fair value pricing is to compute a NAV that accurately reflects the value of the Fund's portfolio at the time that the NAV is calculated, to discourage potential arbitrage market timing in Fund shares, to mitigate the dilutive impact of such attempted arbitrage market timing and to be fair to purchasing, redeeming, and existing shareholders. However, the application of fair value pricing procedures may, on occasion, worsen rather than mitigate the potential dilutive impact of shareholder trading.

Converting from Investor Class to Institutional Class Shares If the current market value of your account(s) in Investor Class shares is at least \$100,000, you may elect to convert the account(s) from Investor Class shares to Institutional Class shares on the basis of relative NAVs, at which time your account will be subject to the policies and procedures applicable to Institutional Class shares. Converting from Investor Class to Institutional Class shares may not be available at certain financial intermediaries, or there may be additional costs involved associated with this conversion charged by your financial intermediary. There is no fee for converting accounts held directly with the Fund. Because the NAV of the Institutional Class shares may be higher or lower than that of the Investor Class shares at the time of conversion, although the total dollar value will be the same, a shareholder may receive more or fewer Institutional Class shares than the number of Investor Class shares converted.

If you have a direct account with the Fund, then you may convert from Investor Class to Institutional Class shares by calling the Fund at 1-888-468-6473. Otherwise, your financial intermediary can contact the Fund to convert your shares from Investor Class to Institutional Class.

Converting from Institutional Class to Investor Class Shares If your Institutional Class account falls below the stated investment minimum because you sell some of your shares, then the Fund reserves the right to give you 30 days' written notice to make additional investments so that your account balance is \$100,000 or more. If you do not make additional investments, then the Fund may convert your Institutional Class shares to Investor Class shares, at which time your account will be subject to the policies and procedures for Investor Class shares. Any such conversion will occur at the relative NAVs of the two share Classes, without the imposition of any fees or other charges if the accounts are held directly with the Fund. Because the NAV of the Institutional Class shares may be higher or lower than that of the Investor Class shares at the time of conversion, although the total dollar value will be the same, a shareholder may receive more or fewer Investor Class shares than the number of Institutional Class shares converted. Where a retirement plan or other financial intermediary holds Institutional Class shares on behalf of its participants or clients, shares held by such participants or clients will be converted to Investor Class shares as described above when a participant or client rolls over its accounts with the retirement plan or financial intermediary into an individual retirement account and such participant or client is not otherwise eligible to purchase Institutional Class shares.

Accounts with Low Balances If the value of your Investor Class account falls below \$10,000 (or \$3,000 for IRA accounts or \$2,000 for Coverdell accounts) because you sell some of your shares, we may notify you to ask you to bring the account back up to its applicable minimum investment amount. If you choose not to do so within 30 days, we may close your account and mail the proceeds to the address of record. You will not be charged a redemption fee if your account is closed for this reason.

Involuntary Redemption The Fund reserves the right to close your account and redeem your shares involuntarily (i) If the Fund is unable to verify your identity, (ii) to reimburse the Fund for any loss sustained by reason of a failure to make full payment for shares purchased, (iii) to collect any charge relating to transactions effected for the benefit of your account which charge is applicable to the Fund's shares as provided in this Prospectus, (iv) if you are deemed to engage in activities that are illegal (such as late trading) or otherwise believed by the Investment Manager to be detrimental to the Fund (such as market timing), to the fullest extent permitted by law, or (v) for other good reasons as determined by the Investment Manager. However, your account will not be redeemed if the balance falls below the minimum due to investment losses. If your account is redeemed, the proceeds will be sent to the address of record.

Statements, Reports, and Prospectus You will receive quarterly account statements that show all your transactions during the quarter. You will also receive written notification after each transaction affecting your account.

You also will receive the Fund's financial reports every six months as well as an annual updated prospectus. You may view the Fund's current prospectus, and any supplements thereto, and financial reports on the Fund's website.

If you choose, you may receive your statements, financial reports, tax documents, prospectuses, and other regulatory material through electronic delivery.

Investment Representative Account Access If there is a dealer or other investment representative of record on your account, he or she will be able to obtain your account information, conduct transactions for your account, and will also receive copies of all notifications and statements and other information about your account directly from the Fund.

Street or Nominee Accounts You may transfer your shares from the street or nominee name account of one dealer to another, as long as both dealers have an agreement with the Fund. We will process the transfer after we receive authorization in proper form from your delivering securities dealer.

Joint Accounts Unless you specify a different registration, shares issued to two or more owners are registered as "joint tenants with rights of survivorship" (shown as "JTWROS" on your account statement). To make any ownership changes to jointly owned shares, or to sever a joint tenancy in jointly owned shares, all owners must agree in writing.

Additional Policies Please note that the Fund maintains additional policies and reserves certain rights, including:

- The Fund may restrict, reject, or cancel any purchase orders.
- The Fund may modify, suspend, or terminate telephone/online privileges at any time.
- The Fund may stop offering shares of a class completely or may offer shares of a class only on a limited basis, for a period of time or permanently.
- Normally, redemption proceeds are paid out by the next business day, but payment may take up to seven (7) days if making immediate payment would adversely affect the Fund.
- In unusual circumstances, the Fund may temporarily suspend redemptions or postpone the payment of proceeds, as allowed by federal securities laws.
- For redemptions over a certain amount, the Fund may pay redemption proceeds in securities or other assets rather than cash if the Investment Manager determines it is in the best interest of the Fund, consistent with applicable law.

Please also note that you may only buy shares of the Fund if they are eligible for sale in your state or jurisdiction. To permit investors to obtain the current price, dealers are responsible for transmitting all orders to the Fund promptly.

Questions

If you have any questions about the Fund or your account, you can write to us at Wintergreen Fund, Inc., c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701, call us toll-free from anywhere in the United States: (888) GOTOGREEN (888-468-6473) (Monday through Friday 8:00 a.m. to 8:00 p.m., Eastern time), or visit us online 24 hours a day, 7 days a week, at www.wintergreenfund.com. All calls may be monitored or recorded for your protection and to help ensure we provide you with quality service.

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance for the past five years by showing information for the Fund's Institutional Class and Investor Class shares. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information has been derived from financial statements audited by Deloitte & Touche LLP, the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statements, are included in the Fund's annual report, which is available without charge by contacting the Fund directly or by visiting the Fund's website.

Privacy Policy

This privacy policy applies to individuals, and we reserve the right to change any or all of the principles, along with related provisions, at any time.

You trust us with your financial and other personal information; we in turn are committed to respect your privacy and safeguard that information.

By adhering to the practices described below, we affirm our continuing commitment to protecting your privacy.

Collection and Use of Shareholder Information

Wintergreen Fund, Inc. and the IRA custodian (“We” or the “Fund”) collect only relevant information about the Fund’s shareholders that the law allows or requires us to have in order to conduct our business and properly service you. We collect financial and other personal information about you from the following sources: information you provide on applications or other forms (for example, your name, address, social security number and birth date); information derived from your transactions with us (for example, transaction amount, account balance and account number); information you provide to us if you access account information or conduct account transactions online (for example, password, account number, e-mail address, alternate telephone number).

Keeping Information Secure

We maintain physical, electronic, and procedural safeguards to protect your financial and other personal information, and we continually assess new technology with the aim of adding new safeguards to those we have in place.

Limiting Access to Information

We limit access to personally identifiable information to only those with a business reason to know such information.

Use of Personal and Financial Information by Us and Third Parties

We do not sell non-public personal information about current or former customers or their accounts to any third parties, and do not disclose such information to third parties unless necessary to process a transaction, service an account, or as otherwise permitted by law.

Those who may receive this information include the companies that provide transfer agent, technology, and administrative services, as well as the investment adviser who is an affiliate of the Fund.

Accuracy of Information

We strive to keep our records of your information accurate, and we take immediate steps to correct errors. If there are any inaccuracies in your statements or in any other communications from us, please contact us or contact your investment professional.
